

EVERY TIME.
GENUINE.

GENUINE CUMMINS BELTS

When your Cummins engine needs a belt, there's a genuine advantage to using a Genuine Cummins Belt. These belts are designed to work efficiently in every kind of operating condition. Every belt is engineered with the latest improvements, built and tested to meet Cummins rigid quality standards. Plus, they come with full warranty coverage for all Cummins

engines. For dependability and long-lasting value, you can't beat a Genuine Cummins Belt.

Every Environment.

Belt life is considerably affected by the operating environment. For example, belt life is shortened considerably in ambient temperatures exceeding 180° Fahrenheit (82.2°C). Dusty and dirty environments cause abrasion and wear to the belt material, affecting its life. Finally, excessive spillage and leakage of solvents, oils, coolants, lubricants and fuels also cause belt wear, reducing its life. Cummins belts are designed specifically to operate efficiently in these kinds of harsh environments. Only Genuine Cummins Belts are guaranteed to be the right belt for your engine in your application and operating conditions. If you want to avoid costly downtime, insist on Genuine Cummins Belts. Buy anything else and you are taking a chance.

Every Confidence.

Genuine Cummins Belts come with a full factory warranty, good for up to six months with unlimited miles, kilometers or hours on MidRange engines. Belts for Heavy-Duty and high-horsepower engines come with a one-year/100,000 mile (160,935 km) or 3,600-hour warranty. This warranty is honored at over 5,500 locations worldwide. So wherever and whenever you need it, Cummins has got you covered.

Every Order, Made Easy.

To ensure that you order the right belt, we have developed a quick and easy tool on QuickServe® Online, at <http://quickserve.cummins.com>. Just type in your Engine Serial Number (ESN) found on the engine data plate, or your Dayco Part Number. If you don't have either of those, enter the dimensions (width, length, number of ribs, etc.) and the tool will return the Genuine Cummins Belt part number designed specifically for your needs, which can then be added to your shopping cart. Or you can simply call or visit your local Cummins dealer or distributor.

Every Question. Answered.

For more information about Cummins Genuine Belts, call us toll-free at 1-800-DIESELS (1-800-343-7357), visit your local Cummins dealer or distributor, or go online at <http://quickserve.cummins.com>.
